

ORDINANCE NO. 2018- 4
TOWN OF CORYDON
ORDINANCE TO AMEND ORDINANCE NO. 2016-2

WHEREAS, the Town Council of the Town of Corydon ("Town"), Indiana wishes to amend the existing Ordinance regulating grease traps;

WHEREAS, the Town has determined that the minimum size of the grease trap allowed in the original ordinance was unnecessary and burdensome for local businesses;

NOW THEREFORE BE IT ORDAINED by the Town Council of the Town of Corydon, Indiana that the existing Grease Trap Ordinance (2016-2) be amended as follows for Section 7, subsection (a), 1 and 2 (Composition) with the original and first amendment language stricken and replaced with the following:

Section 7. Grease Trap Maintenance

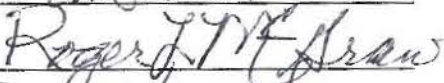

- (a) All grease traps shall be maintained by the owner so as to be in continuously efficient operation. Maintenance shall include the complete removal of all contents by a properly licensed waste hauler. Top skimming, decanting or back flushing of the grease trap or its waste is prohibited. Further, the discharge of liquid, semi-solids, or solids into a grease trap from vehicles after servicing is prohibited. Vehicles capable of separating water from grease shall not discharge separated water into the grease trap or into the wastewater collection system. Cleaning and maintenance of all grease traps shall include removal of materials from the tank walls, baffles, cross pipes, inlets and outlets, and the cover. Recyclable fats, oils and greases shall not be discharged into the publicly owned treatment works. Any violation in the removal of grease waste shall result in prosecution under applicable state law. Maintenance shall be performed at frequencies as detailed below:
1. Maintenance shall be performed at intervals of not less than once every 90 days and as required by the "30% Rule". Any solids interceptor should be emptied and cleaned daily. Outdoor grease interceptors shall have a minimum of **1,000 gallon** capacity.
 2. Maintenance shall be performed at intervals not less than once every 30 days. A variance is required to operate an indoor grease trap in place of a **1,000 gallon** minimum outdoor interceptor. Indoor grease traps shall have a minimum of 100 pound capacity. Any current originator tied to the Town of Corydon collection system that currently operates an indoor grease trap, regardless of size, shall prove to the satisfaction of the Town of Corydon that they are not discharging illegally or upgrade to a **1,000 gallon** minimum outdoor grease interceptor. Originators may not operate indoor grease traps with a capacity of less than 100 pounds. A solids interceptor tied to an indoor grease trap should be emptied and cleaned daily.

EFFECTIVE DATE: This Ordinance shall become effective immediately upon passage by the Town Council of the Town of Corydon, Indiana.

PASSED AND ADOPTED BY THE TOWN COUNCIL OF CORYDON, INDIANA THIS 13th
DAY OF August, 2018.

Eva L. North, President

Roger L. McGraw, Vice President

John D. Kintner, Member
